

Canton Feature

Terms and Conditions

Effective from the date of activation – Last updated: April 2026

These Terms and Conditions (the "**Terms**") govern your access to and use of the Canton Feature offered by Trakx SAS ("**Trakx**") through the Trakx platform (app.trakx.io). By activating the Canton Feature, you agree to be bound by these Terms in addition to the Trakx General Terms of Use and any other applicable agreements between you and Trakx.

Article 1 – Definitions

Canton Network: A public, enterprise-grade blockchain infrastructure operated by Digital Asset and a consortium of financial institutions, using the Daml smart contract language.

Canton Coin (CC): The native token of the Canton Network, used as a means of exchange and reward distribution within the ecosystem.

Canton Feature: The optional service that enables your Trakx account to interact with the Canton Network, including the creation or use of a Canton Party ID and the on-chain management of your CTI holdings.

Canton Party ID: A unique cryptographic identifier on the Canton Network, either created and managed by Trakx on your behalf under its validator node, or provided by you as an existing Canton Network participant.

CTI Tokens (Crypto Tradable Indices): Asset-backed tokens issued by Trakx on the Canton Network, representing diversified baskets of digital assets.

Featured App Rewards / CC Rewards: Canton Coin rewards generated by Trakx as a Featured Application on the Canton Network, as a result of on-chain activity attributable to users of the platform.

Platform: The Trakx web application accessible at app.trakx.io and related services.

Article 2 – Eligibility and Activation

2.1 Eligibility

The Canton Feature is available to registered Trakx users who have completed the KYC/AML verification process and hold a fully approved Trakx account. By activating the Canton Feature, you confirm that:

- You are at least 18 years of age or have the legal capacity to enter into binding agreements in your jurisdiction;
- You are not located in, or a national or resident of, any jurisdiction subject to applicable sanctions or where the use of digital assets is prohibited or restricted;
- Your Trakx account is in good standing and your KYC/AML verification is current and valid.

2.2 Activation

The Canton Feature is activated by checking the acceptance box in the Canton section of your Trakx profile and accepting these Terms. Activation is subject to review by Trakx and is typically processed

within 48 business hours. Trakx reserves the right to decline or revoke activation without providing reasons, consistent with its compliance obligations.

2.3 Pricing

The Canton Feature is currently provided free of charge. Trakx reserves the right to introduce fees in the future. Any change to the pricing of the Canton Feature will be communicated to you with at least 30 days' prior written notice in accordance with Article 10 (Amendments). Your continued use of the Canton Feature after the effective date of a pricing change will constitute acceptance of the new fees. If you do not wish to pay the applicable fees, you may deactivate the Canton Feature before the new pricing takes effect.

Article 3 – How the Canton Feature Works

3.1 Canton Party ID

If you do not already have a Canton Party ID: Trakx will create one for you under its validator node on the Canton Network MainNet. Trakx will store and manage the technical credentials associated with your Party ID on your behalf. You will not hold independent custody of the private keys associated with it.

If you already have an existing Canton Party ID (through your own Canton node or another Canton member institution): Trakx will record your Party ID in your Trakx profile and configure the necessary wallet automations to enable interaction between your Party ID and Trakx's Featured Application. In this case, you retain control over your own Canton credentials and private keys.

In both cases, your Canton Party ID will be associated with your Trakx account and used to reflect your on-chain CTI holdings and trading activity.

3.2 Transfer of CTI Holdings to Canton

By activating the Canton Feature, you instruct Trakx to transfer 100% of your eligible CTI holdings to the Canton Network. Once transferred, your CTI tokens are held on-chain under your Canton Party ID. Your Trakx account dashboard will reflect the on-chain position associated with your Party ID.

3.3 Wallet Automations

To enable the proper functioning of your Canton wallet, Trakx will configure the following automations on your behalf at activation:

- Automatic acceptance of CC and CTI transfers from the Trakx issuer party;
- Automatic UTXO merging to maintain wallet efficiency;
- Registration to support on-chain credential management.

These automations are necessary for the correct operation of the Canton Feature and cannot be individually disabled without deactivating the feature entirely.

3.4 Trading, Deposits and Withdrawals

Once activated, your trading activity on eligible CTI products through the Trakx platform will be reflected on-chain on the Canton Network. Deposits and withdrawals of supported Canton assets (including CTIs) are managed exclusively through the Trakx platform (app.trakx.io) and any Trakx-operated tools made available to you within your account. Trakx reserves the right to modify the technical means by which deposits and withdrawals are processed, provided that such changes do not materially affect your rights.

Article 4 – Canton Coin Rewards

4.1 No Guaranteed Rewards

Trakx, as a Featured Application on the Canton Network, may generate CC rewards as a result of on-chain activity. The Canton Feature does not entitle you to any guaranteed share of these rewards. CC reward generation is subject to the rules and parameters of the Canton Network tokenomics, which are subject to change at any time by the Canton Network governance.

4.2 Future Reward Programmes

Trakx may, at its sole discretion, introduce a user reward programme in the future that shares a portion of CC rewards with active Canton Feature users. Any such programme will be governed by separate terms and conditions communicated to you in advance.

Article 5 – Risk Factors

By activating the Canton Feature, you acknowledge, understand, and accept the following risks:

Digital Asset Volatility: The value of CTI tokens and Canton Coin is highly volatile. The value of your holdings may decrease significantly or become worthless. Past performance is not indicative of future results.

Regulatory Risk: The regulatory environment for digital assets is evolving. Changes in applicable laws or regulations may affect the availability, legality, or taxation of the Canton Feature or your digital asset holdings.

Technology Risk: The Canton Feature relies on blockchain infrastructure, smart contracts, and third-party services. You may be exposed to risks including network outages, smart contract bugs, cyberattacks, protocol forks, or failures of third-party infrastructure providers.

Custody and Key Management Risk: If Trakx creates a Canton Party ID on your behalf, your cryptographic credentials are managed by Trakx and you do not independently control the associated private keys. In the event of a security incident affecting Trakx, you may be exposed to loss. If you provide an existing Canton Party ID that you control independently, you remain solely responsible for the security of your own credentials and private keys.

Canton Network Governance Risk: The rules of the Canton Network, including tokenomics, reward structures, and protocol parameters, may be changed at any time by the network's governance bodies. Trakx has no control over such changes.

Liquidity Risk: CTI tokens and Canton Coin may have limited liquidity. You may not be able to sell or transfer your holdings at the desired price or time.

Tax Risk: Transactions involving digital assets, including the transfer of CTIs to Canton and any CC rewards received, may have tax consequences in your jurisdiction. You are solely responsible for determining and meeting your tax obligations.

Total Loss Risk: You may lose the entire value of your digital asset holdings. Do not invest more than you can afford to lose.

Article 6 – User Obligations

- You must maintain your Trakx account in good standing and keep your KYC/AML documentation current.
- You must not use the Canton Feature for any unlawful purpose, including but not limited to money laundering, terrorist financing, or sanctions evasion.

- You must not attempt to circumvent, reverse-engineer, or interfere with the Canton Feature or any related technical infrastructure.
- You are responsible for the security of your Trakx account credentials. You must notify Trakx immediately of any suspected unauthorised access.
- You acknowledge that instructions submitted through the Canton Feature (including CTI transfers and trades) are final and irreversible once confirmed on the Canton Network.

Article 7 – Data Protection

Trakx processes your personal data in connection with the Canton Feature in compliance with Regulation (EU) 2016/679 (GDPR). The personal data processed includes your account information, KYC/AML documentation, transaction data, and Canton Party ID. This data is processed for the purposes of providing and managing the Canton Feature, fulfilling legal and regulatory obligations, and fraud prevention.

You have the right to access, rectify, oppose, delete, and port your personal data, subject to applicable legal limitations. Requests may be addressed to support@trakx.io. Your data may be shared with third-party service providers (including custodians, KYC providers, and Canton Network infrastructure operators) within or outside the EU, subject to appropriate safeguards. For full details, please refer to the Trakx Privacy Policy available on the Platform.

Article 8 – Limitation of Liability

To the fullest extent permitted by applicable law:

- Trakx's total liability arising out of or in connection with the Canton Feature shall not exceed the fees paid by you to Trakx in the 12 months preceding the event giving rise to the claim;
- Trakx shall not be liable for any indirect, incidental, special, consequential, or punitive damages, including loss of profits, loss of data, or loss of goodwill;
- Trakx shall not be liable for losses resulting from: (a) volatility or decline in the value of digital assets; (b) failures or outages of the Canton Network or third-party infrastructure; (c) cyberattacks, hacking, or unauthorised access to the Canton Network; (d) changes to Canton Network rules, tokenomics, or governance; (e) any force majeure event.

Nothing in these Terms limits Trakx's liability for fraud, gross negligence, or wilful misconduct.

Article 9 – Suspension and Termination

9.1 Deactivation by User

You may deactivate the Canton Feature at any time from your Trakx account settings. Upon deactivation, Trakx will initiate the offboarding process, which includes the transfer of your on-chain CTI holdings back to your Trakx account. This process is subject to Canton Network transaction processing times and may take up to 30 business days.

9.2 Suspension or Termination by Trakx

Trakx may suspend or terminate your access to the Canton Feature immediately and without prior notice if:

- You breach these Terms or any other agreement with Trakx;

- Trakx is required to do so by applicable law, regulation, or a competent authority;
- Trakx has reasonable grounds to suspect fraudulent, unlawful, or abusive use of the Canton Feature;
- Your Trakx account is suspended or terminated for any reason.

9.3 Effect of Termination

Termination does not affect any rights or obligations that have accrued prior to the effective date. All provisions of these Terms that by their nature should survive termination shall do so, including Articles 5 (Risk Factors), 7 (Data Protection), 8 (Limitation of Liability), and 11 (Governing Law).

Article 10 – Amendments

Trakx reserves the right to amend these Terms at any time. Changes will be communicated to you via email or through the Platform at least 15 days before they take effect. Your continued use of the Canton Feature following the effective date of any amendment constitutes your acceptance of the updated Terms. If you do not accept the amended Terms, you must deactivate the Canton Feature prior to the effective date.

Article 11 – Governing Law and Jurisdiction

These Terms are governed by French law. Any dispute arising out of or in connection with these Terms shall be subject to the exclusive jurisdiction of the Commercial Court of Paris (Tribunal de Commerce de Paris).

Article 12 – Miscellaneous

These Terms, together with the Trakx General Terms of Use and Privacy Policy, constitute the entire agreement between you and Trakx with respect to the Canton Feature. In the event of any conflict between these Terms and the General Terms of Use, these Terms shall prevail with respect to the Canton Feature. If any provision of these Terms is found to be invalid or unenforceable, the remaining provisions shall continue in full force and effect.

Trakx SAS – Société par actions simplifiée – SIREN 850 626 078 – 10 rue de Penthièvre, 75008 Paris, France.

Acceptance

By checking the acceptance box on the Trakx Platform and submitting your activation request, you confirm that:

- You have read, understood, and agree to these Terms in their entirety;
- You acknowledge the risks described in Article 5;
- You authorise Trakx, if needed, to create your Canton Party ID and configure the wallet automations described in Article 3 on your behalf;
- You instruct Trakx to transfer all your eligible CTI holdings to the Canton Network upon activation.

If you do not agree to these Terms, do not activate the Canton Feature.
