

Transition Terms

September 2026

This document explains an important change to the provision of crypto-asset services associated with your Trakx account.

Acceptance takes place in the Trakx interface, in a single step. Please read these Terms carefully before accepting them.

1. What is changing

These terms govern the proposed transition to GOin of the crypto-asset services associated with your Trakx account (the “**Terms**”).

If you accept the Terms and GOin subsequently accepts you as a client:

- Following completion of the transition, Trakx’s role will be limited to that of a benchmark provider. Trakx will develop and maintain crypto-asset benchmarks and will continue to operate its website for that activity. It will not provide regulated crypto-asset services, hold or custody your crypto-assets, act as your counterparty, receive or transmit your orders, or maintain the official register of your holdings.

Trakx may make available an interface displaying information relating to your crypto-asset investment, based on information communicated by CASPs, including GOin. That display is for information purposes only and does not constitute custody, execution, portfolio management or the official register of your holdings.

- GOin becomes your regulated service provider. GOin SAS, RCS Paris 839 009 669, is a Crypto-Asset Service Provider (“**CASP**”) authorised by the AMF under no. A2025-002. Subject to the GOin Contracts (see below Section 2) and their entry into force, GOin will be responsible for the custody of your crypto-assets, will act as your counterparty when you buy, sell or exchange crypto-assets, will manage your portfolio under mandates, will carry out anti-money-laundering checks, and process your deposits and withdrawals.

For this transition, you may either: (i) apply to become a GOin client, subject to GOin’s due-diligence procedures (including KYC and, where applicable, an appropriateness assessment); or (ii) decline the transition.

To apply for the transition of the relevant crypto-asset services to GOin, you must accept the Terms in the Trakx interface, in a single step. Your acceptance constitutes a request to become a GOin client. It remains subject to GOin’s own checks and express acceptance (see Sections 3 and 7).

If you accept the Terms, GOin may contact you directly to complete its KYC and onboarding procedures, using the information and documents transferred. GOin may request additional information or documents.

If you decline the transition, no transfer to GOin will take place. Trakx will communicate the options available to you under its wind-down process, including, where applicable, the return and/or liquidation of your crypto-assets and index position (“**CTI**”).

2. The GOin Contracts you enter into

If GOin accepts you as a client, access to its services will be governed by the following contracts (“GOin Contracts”):

- **The Contract for Brokerage and Custody of Crypto-Assets.** This governs GOin's custody, brokerage and transfer services.
- **The Management Contracts.** They govern GOin's discretionary management of your portfolios. Under those mandates, GOin manages your portfolios on a discretionary basis and you may not intervene in that management.

The policies and fee schedules referred to in the GOin Contracts are made available on GOin's website at https://goin-invest.com/attachments/GOin-Pricing_policy-FR.pdf.

3. By accepting the Terms, you acknowledge and agree that:

- Trakx's role will be limited to that of a benchmark provider following completion of the transition. From that time, Trakx is not your custodian or counterparty, does not receive or transmit your orders, is not responsible for the regulated services provided by GOin, and is not responsible for GOin's acts or omissions.
- You are submitting a request to become a GOin client. Accordingly:
 - Your personal data will be transferred to GOin including your identity-verification (KYC) documents necessary for GOin to assess your application, perform its anti-money-laundering obligations and, if applicable, provide its services.
 - **Your onboarding with GOin is not automatic. GOin must complete its own client-registration, identity-verification (KYC) and anti-money-laundering procedures before accepting you as a client. GOin may request further information or documents and may decide not to accept your application, without being required to provide reasons where permitted by applicable law. Until GOin has expressly accepted you as a client, the GOin Contracts do not take effect and no transfer of your crypto-assets to GOin will be implemented. GOin will notify you by email if your application is accepted.**
- **GOin becomes your CASP for the relevant regulated services.** Only after GOin has accepted your application, the GOin Contracts have entered into force and your crypto-assets have been received by GOin, GOin will become the sole provider of the custody, transfer, brokerage and management services covered by those contracts.
- To the extent that you have entered into a management mandate or similar/other agreement with Trakx in connection with your Trakx account, that agreement will terminate when GOin has accepted you as a client and received your crypto-assets. From that date, the GOin Contracts will exclusively govern your relationship with GOin. This termination and replacement do not transfer to GOin, and GOin does not assume, any obligation or liability arising before that date. Any agreement with a wealth-management adviser or other intermediary that is not a party to these Terms is unaffected and must be dealt with separately.
- **Transfer of your crypto-assets to GOin.** You authorise the on-chain transfer to GOin's custody of the crypto-assets (*i.e. the corresponding constituents*) held for you in connection with your Trakx account. The transfer will be initiated only after GOin

has accepted you as a client and after the signing of the Contracts. It remains subject to the eligibility of the relevant crypto-assets¹.

- Transfer times depend on, among other things, the applicable blockchain and third-party processes. Once Trakx has initiated the transfer, it will take a few minutes to one (1) business day.
- **GOin's lists apply.** GOin's custody, purchase, sale and exchange services are limited to the crypto-assets on the [GOin Whitelist](#) (See Appendix A of the Terms). Deposits and withdrawals are limited to the crypto-assets on the GOin Shortlist, detailed in Appendix A. These lists are periodically reviewed by GOin and subject to changes. If a crypto-asset you hold is removed from the GOin Whitelist, GOin may, in accordance with the GOin Contracts and after informing you, arrange for its return or conversion into another authorised crypto-asset.
- **A minimum applies to join.** Entering into a relationship with GOin is subject to the minimum initial amount displayed in the interface. This minimum applies on entry only and is not a minimum amount that you must maintain.

4. How the service works from now on

- GOin policies apply. The public provisions are available on GOin's website: [GOin | Policies and procedures](#).
- You can access your GOin account directly on [GOin's platform](#) (access will be granted once you become a GOin client).
- GOin acts as counterparty — no guaranteed price. When you buy, sell or exchange crypto-assets, GOin acts as your counterparty and provides a price in its own name, in accordance with the GOin Contracts. There is no order book or real-time matching. A transaction is not immediate and the execution price may differ from the indicative value displayed in the interface.
- The price is not the index (NAV) value. The value shown for an index (CTI) is indicative only. The final price is the price quoted by GOin as counterparty and may differ materially from that indicative value.
- Your positions on Trakx interface are indicative. The CTI quantities shown in the interface are indicative. For the GOin services, the authoritative register of your holdings is the register maintained by GOin as the custodian.
- The indices (CTIs) displayed on Trakx' website can be used as benchmarks for the Management Contracts. Once the mandates are in force, GOin manages the portfolios on a discretionary basis. Any subscription, redemption or other request remains subject to the GOin Contracts, your investment profile and GOin's applicable legal and regulatory obligations.
- Buying and selling with legal tender. Where you fund your account with legal tender, or cash out to legal tender, you place a buy or sell order with GOin, which acts as counterparty. GOin does not hold legal tender in custody.
- Deposits and withdrawals. Deposits and withdrawals must be requested from GOin in advance and are subject to GOin's validation before any transfer. They may only be made to or from an address or account held in your name. Once validated and executed, a transfer is irrevocable and cannot be cancelled. Withdrawals are processed by GOin and are not instant.

¹ Depending on the concerned crypto-assets and your index positions (CTI), Trakx may need to convert the crypto-assets and/or CTI in USDC or BTC and USDC/BTC will be transferred to GOin.

- GOin may run checks at any time. GOin may carry out further KYC / anti-money-laundering checks at any time, including before carrying out a transaction, and may suspend, delay or refuse a request on that basis.
- Your reporting comes from GOin. You can access your transactions, balances and fees in your GOin account.

5. Fees

Trakx does not charge a fee for the transfer of your crypto-assets to GOin as part of this transition. However, you may be subject to gas fees that will apply for the transfer of your crypto-assets to GOin. The gas fees will be deducted directly from your assets by Trakx.

You will be informed of the applicable fees before the performance of the transfer of your crypto-assets by Trakx to GOin.

Fees, costs or charges applicable to the GOin services after the transition, including any network or transaction costs where applicable, remain governed by the GOin Contracts and the applicable fee schedule.

The fees applicable to GOin's services are set out in the GOin Contracts and published on [GOin's website](#). They may include, as applicable, a management fee and a performance fee under the Management Contracts, and custody fees, brokerage fees and transfer costs under the Brokerage and Custody Contracts. GOin will deduct fees from your holdings in accordance with the GOin Contracts.

6. Risks

GOin's Risk Disclaimer applies and is published on [GOin's website](#). You should read it carefully before accepting the Terms and the GOin Contracts.

7. When the change takes effect

When you accept the Terms, your request is sent to GOin. GOin then carries out its client-registration, identity-verification (KYC) and anti-money-laundering procedures. Acceptance of the Terms does not itself create a client relationship with GOin and this process may take some time.

The transfer of your crypto-assets (subject to the eligibility of the relevant crypto-assets) to GOin will be initiated only after GOin has accepted you as a client and after the GOin Contracts have entered into force. The transition is completed only when GOin has received those crypto-assets in its custody. Transfers are not instantaneous.

If GOin does not accept you as a client, the transition will not take effect for you and your crypto-assets will not be transferred to GOin. Trakx will communicate the options available to you under its wind-down process.

Once GOin has accepted you as a client and the transition has been completed, the terms and conditions governing the relevant crypto-asset services provided by Trakx will terminate as between you and Trakx, in accordance with the applicable terms and conditions available there: [Terms and Conditions](#).

8. Personal data

Your personal data are processed by Trakx, as data controller, in accordance with its [Terms and Conditions](#). Trakx processes your personal data in order to perform the present Terms.

Your personal data is kept by Trakx during the entire period of the contractual relationship, then kept in intermediate archives for a period corresponding to applicable regulatory requirements, including AML-CFT, to which is added the applicable legal prescription period (5 years in most cases).

Your personal data is processed both manually and electronically and is protected by appropriate security measures. In this respect, although Trakx uses appropriate administrative, technical and organizational measures to protect personal data against theft, loss, unauthorized use, disclosure or modification, it cannot guarantee that it will be able to protect itself against all existing IT risks.

Within the framework of the purposes of processing, your personal data is communicated internally within Trakx, to the customer service, the marketing/commerce department and the IT department.

As provided in the Terms, your personal data will be transferred to GOin. Your personal data may be transferred to other service providers acting on Trakx' behalf that are located within the European Union.

In accordance with the applicable regulations on the protection of personal data, you may have:

- a right of access (and) rectification, erasure and portability of your personal data;
- a right of limitation and opposition for legitimate reasons to the processing of your personal data;
- the possibility to give us instructions concerning the use and disclosure of your personal data (retention, erasure, third party transfer, etc.) after your death.

You also have a right to lodge a complaint against a supervisory authority such as the Commission Nationale de l'Informatique et des Libertés, the "CNIL", in the event of a breach of the Applicable data protection regulations.

You may exercise these rights by writing to the following e-mail address: support@trakx.io.

However, your opposition may, in practice and as the case may be, have an impact on the performance of the Terms.

GOin will process your personal data in accordance with its [Privacy Policy](#).

9. Governing law and language

These Terms are governed by French law, subject to any mandatory provisions of applicable law. Any dispute is subject to the jurisdiction of the competent French courts, subject to mandatory rules on jurisdiction. These Terms are provided in English; if a French version is issued, the French version prevails.

10. Acceptance

By ticking the box and signing electronically in the interface, in a single step, you: (i) apply to become GOin client, subject to GOin's acceptance; (ii) acknowledge the termination of any existing management mandate with Trakx as described herein; (iii) authorise the transfer of your data to GOin

for its onboarding procedures and the transfer of your crypto-assets to GOin once GOin has accepted you as a client; and (iv) accept these Terms.

Appendix A – GOin Shortlist

Updated on September 4th, 2026

Crypto-Asset	Protocol(s)	Deposits / Withdrawals
Aave (AAVE)	Ethereum	Supported
Avalanche (AVAX)	Avalanche (C-Chain)	Supported
Bitcoin (BTC)	Bitcoin	Supported
Bitcoin-cash (BCH)	Bitcoin Cash	Supported
Bnb (BNB)	Binance Smart Chain	Supported
Chainlink (LINK)	Ethereum	Supported
Dogecoin (DOGE)	Dogecoin	Supported
Ethereum (ETH)	Arbitrum One, Base, Ethereum, Optimism, zkSync Era	Supported
Litecoin (LTC)	Litecoin	Supported
Solana (SOL)	Solana	Supported
The-graph (GRT)	Ethereum	Supported
Tron (TRX)	Tron	Supported
